

Class Status or Gender? Reading and Sociability at the Court of Duchess Anna Amalie of Saxe-Weimar and Eisenach (c. 1795)

Abstract

Women participated actively in Enlightenment discourse. They published journals, for instance, or contributed to them. But as the media market became increasingly organized around commercial objectives, women lost their position. This was because German society began to rely more heavily on gender, as a category, to distinguish between spaces marked as “political/public” vs. “non-political/private,” or as male and female, respectively. In courtly dynastic contexts, on the other hand, class status and proximity to the ruler still remained decisive. If the courtly social life of Duchess Anna Amalia of Saxe-Weimar and Eisenach (1739–1807), depicted here in stylized form, included commoners, then they were men. If women took part, they were invariably of noble origin.
